Art Unit: 1746

1. Claims 10-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 10, lines 2-3, the phrase "said treatment fluid parameter values" is without proper antecedent basis.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Germany'254 (Germany 29 49 254), Germany'351 (Germany 36 26 351) or Mueller-Kirschbaum et al. (U. S. Pat. No. 5,536,663).

Re claim 1, Germany'254, Germany'351 and Mueller-Kirschbaum each disclose the process of operating a water-bearing appliance in a program sequence (typical), measuring the fluid parameters via an optical sensor and comparing the measured value with a known (reference) value.

2. Claims 11-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In EPO'486, EPO'914, Germany'266, Bobb et al., Japan'490, Poisel et al., Japan'498, Japan'797 and Japan'099, note the optical sensor means.
